

FLEET INTERFACE DATA

ADVANCE YOUR FLEET MANAGEMENT

Our multi-brand data solution will help you optimize your fleet management and strategically develop your fleet. Selected data points enable the analysis and optimization of the total cost of ownership, drive forward issues of sustainability and aid the digitalization of your business processes.

TCO
optimization

Accurate analytics
and reporting

Sustainability
compliance (CO₂)

Scalability/
adaptability and
easy integration

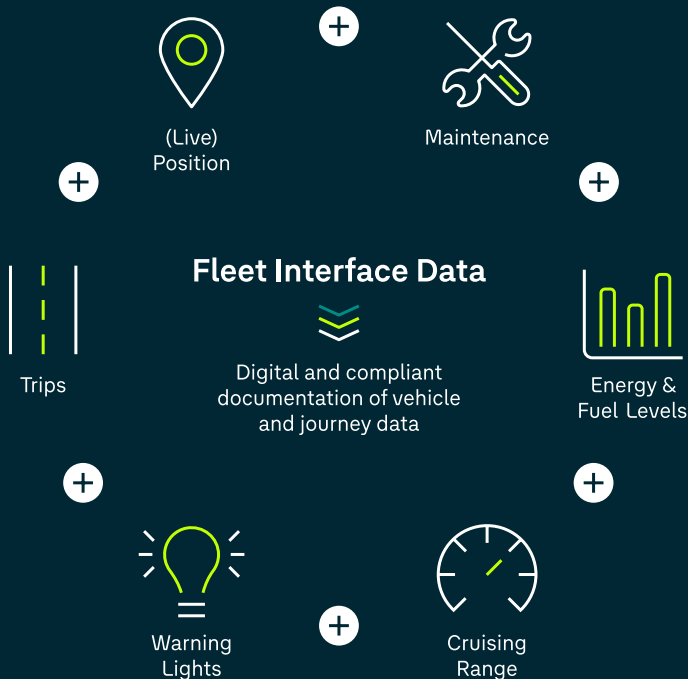

Dongle-free
solution

Reliable data
directly from OEM

DATA-DRIVEN FLEET MANAGEMENT. FOR HIGHER PERFORMANCE.

Fleet Interface Data contains maintenance data, energy levels, trip data, remaining range, warning lights, and position information. It can be seamlessly integrated into your existing fleet management software via API, eliminating the need for workarounds like dongles or retrofitted hardware.

+ EFFICIENCY
due to
cross-brand
connectivity

+ COMPETITIVENESS
thanks to
advanced
analytics

+ COST SAVINGS
since no telematics solution is needed

+ TIME SAVINGS
through reduced downtime

Volkswagen Group Info Services is the central interface to mobility data by multiple Volkswagen Group brands. As an independent legal entity, we are the creator and home of the Data Hub. With insights from various data sources, we shape services and products, laying the foundation for the commercial data business and generating new revenue streams through the licensing of data products.

Data for European business from the following brands:
