# FLEET INTERFACE DATA

## ADVANCE YOUR FLEET MANAGEMENT

Our multi-brand data solution will help you optimize your fleet management and strategically develop your fleet. Selected data points enable the analysis and optimization of the total cost of ownership, drive forward issues of sustainability and aid the digitalization of your business processes.

Fleet Interface Data can be integrated into your existing fleet management software via API. This eliminates the need for previous workarounds such as dongles or retrofitted hardware.

**Fleet Interface Data aids your specific fleet management needs:**

| TCO optimization | Accurate analytics and reporting | Sustainability compliance ($CO_2$) | Scalability/ adaptability and easy integration | Dongle-free solution | Reliable data directly from OEM |

## YOUR ADVANTAGES AT A GLANCE:

### Data-driven fleet management

- Utilize vehicle data to optimize your total cost of ownership
- Use real-time tracking for more accurate reporting and better analysis of fleet requirements
- Easier $CO_2$ reporting and sustainability compliance
- Digital and compliant documentation of vehicle and journey data
- Reduced downtime and maintenance costs
- Grow your knowledge about your fleet

### Dongle-free solution

- Integration of the data into existing fleet management software by means of a technical interface (API)
- Vehicle-independent solution without dongles/hardware retrofitting
- Time and cost savings by eliminating the need to (re)install a telematics solution in every vehicle

### Multi-brand dataset

- Data of six Volkswagen Group brands
- Individually selectable data packages
- Contains maintenance data, energy levels, trip data, remaining range, warning lights, and position information
